

MICHAŁ SAŁEK

ABOUT ME

From an early age I am interested in computer technology, equipment related to it, and fascinated by the software. My job required from me, to know the latest news, from the world of new technology and possess strong interpersonal skills.

Music is truthfully at the top of my passions, it's with me almost always. Alongside music, I find solace in the world of motorization. But amidst all the hobbies, nothing compares to the joy of meeting my friends, as we share laughter, stories, and create fabulous memories.
